The aim of this ACM student chapter is to acquire or refer potential resources for assisting learner's deliverables. Identifying and classifying research topics to its last publication state is the crucial factor to design or solve recent challenges or to contribute into the existing scientific literature. Acquire, and Share recent breakthroughs among learners are the prime objective of the JIS ACM Student Chapter. The technology gap at the pre-final year stage of learners always deviate them from the focus of problem solving. A framework consists of a hands-on seed topics, plug and play tools, available standard dictionaries or data set is the other side of guidance.

Compute 2014 held from October 9th-11th at Visvesvaraya National Institute of Technology, Nagpur was the 7th ACM INDIA CONFERENCE. The event was a successful one as there was wide participation from different parts of the country as well as from abroad.

It was a nice experience to be able to be a part of it. There were keynote addresses and tutorial sessions by various technical experts on various interesting topics such as ‘Mobile cloud computing’, ‘High performance big data analytics’, ‘Making applications ready for HPC platform’ and many others. They were also 21 interesting research papers which were presented during the research sessions besides those already mentioned. Apart from the technical part of the program, there were proper arrangements made for the various chapter representatives, which included accommodation at the VNIT hostel no.8, the quality of the food served and the other facilities that were made available. The music concert held at Persistent, IT Park, followed by conference dinner that were organised in between the busy conference schedule also proved to be a delight.

There was a lot to learn not only from the conference but also from the different Student and Professional Chapters, which were presented on the final day of the conference during the Chapter Summit. And it goes without saying that the VNIT campus was a very likely campus to hold the Compute 2014 and the professors and students at VNIT being very kind and helpful. The ACM dignitaries motivated and encouraged the participants beyond heights to carry out further activities and take their Chapters to a different level. Overall, it was a rare privilege to attend the event.

COMPUTE 2014 attended & Report Prepared by Kaushik Auudy, (B.Tech. IT-3rd Year-ACM Student Member) & Siddhartha Roy (B.Tech. CSE-3rd Year- ACM Student Member) from JIS ACM Student Chapter.
