Origin of Photography and Short Film Club

Photography and short film club was founded by some students and faculty members with the inspiration the college authorities in 2013 and is now nine years old in 2022.

In its founding year itself, it gained a huge response from all corners of JISCE. Not only students but a huge part from the faculty and staff members joined this club and the journey of PTC started. It is one of the most active clubs of JISCE. This club has a major role in each and every event conducted by JISCE. These club members actively cover whole events like Tech Fest, Sports day, Republic day, JIS Samman, Foundation day etc.

ALEYA - "A Touch of Lens"

To taste the photographic sense of new 1st year students, photography and short film club conducts ALEYA right after the New Academic session starts.

The competition enhances the interest of the new entrants towards photography where they also get chance to get nurtured with PSFC and also learn from their mistakes.

ALEYA...

IMAGery

On the occasion of JIS Tech, the Tech symposium, photography club conducts iMAGery. Students From other Institutes along with the internal students of the college participate in this exhibition and competition. Every year there were various categories of recent genres.

Essence of Light

Durga puja, also known as Durgotsav or Sarodotsav, is an annual festival which is originating in the Indian subcontinent. In this time whole city rejoices in festive mood. Every dark side seems to be illuminated in the light of festival. During this time, Photography & Short Film Club of JISCE organizes photography competition. Beautiful photo of festival published in social media through our club. In this way the photography club has made its mark as an important club year after year.

Lock Down Phase

In the lockdown phase, to encourage students, the club conducts some photography competitions.

Such as “Knock Down the Lockdown”, “Imagery – in digital mode”, “Chitrita”.

This type of initiatives makes this club very popular among the students.

Glimpse of iMAGery 2k21

(A photo exhibition in digital mode)

Winter Photo Festival

In the lockdown situation, when we all are at our home our Photography & Short film club has organized an online photo festival.

JIS Tech

JIS Tech is the signature event of East India. Like every other year, this year also got to experience the final offline exhibition of this programme in the college campus on 8th October. JIS Tech greatly aids the students in cultivating a Promethean psyche. The occurrence gets to see all kinds of innovatory models as in numerous hardware devices, software applications, robotic modernizations, etc. The contrivances of the participants pay off as their concoctions reach the audience through the artistic flairs of "Photography & Short Film" Club. All these varied contributions augment to the fruition of the event.

JIS SAMMAN

JIS Samman programme is an attractive & scintillating part of JIS College of Engineering. Like every year, this year also remained witness to the vivid schedule of the programme from 1st February to 6th February. The programme consisted of plethora of various activities mainly recitation, drawing, debate, singing, dancing, sports, photography to a wide range of amalgamation of Idea submission competition. The contrivances of the participants pay off as their concoctions reach the audience through the artistic flairs of "Photography & Short Film" Club. All these varied contributions augment to the fruition of the event.

SPORTS MEET

At the beginning of every year a sport event is organized by JIS College of Engineering. In this event Photography and Short Film Club plays an important role. This club captures every delightful moment and action of sports event.

VACCINATION DRIVE

As we all know for the last two years corona named virus has disrupted normal human life. So in this pandemic situation our JIS College of organized a vaccination drive for 18 to 60+ year aged people in college. Here photography and short film club covered the whole process.

Alumni Voice

Hi I'm **Deepon Ganguly**. To take a good picture or to do good photography, one really doesn't need to have a DSLR cameras. If you have a mobile and simple basic knowledge regarding photography, one can easily do great photography. You just need to improve your basic photography knowledge like framing, play with light, exposure and angles, and call yourself a Mobile Photographer like me.

Alumni Voice

Hello! **Ratul Sarkar** this side. I started my photography journey when I was in my second year, I got introduced to our Photography club head Dr. Rupak Bhattacharjee & it was the day when our team was also introduced. I utilized my free time with my teammates, went on photo tours, photo walks with my seniors - Koustav Das, Sayan Acharya & they taught me a lot!! Managing education & photography parallelly was kinda difficult for me at the beginning but gradually I learned to balance both my professional life & passion from my friends, team members, seniors, mentors. Right now, I'm staying in Kolkata working at Capital numbers as a UX/UI designer. And I'll continue my photography career.

The most important thing is teamwork, if there's no synchronization, no teamwork, no trust, then the club won't survive for long. I suggest keeping only those people who not only love photography but get excited from the aspects, like composition, storytelling. Quality is most prior, not the quantity!

Alumni Voice

Hi I'm **Somdutta Chakraborty**. Always loved to capture the beautiful sunsets initially from the schooldays with a digital camera. After getting into college, came to know about PTC in the induction program and joined instantly without any second thought. Things became much more interesting after joining PTC and learnt a lot about photography from the seniors and mentors having excellent skills and knowledge. Managing the studies and photography parallelly is not a big deal if your favorite hobby to invest time is photography. And photography itself is mathematics regarding every measurement and calculation.

Currently working in INSYNC as an Associate and the work pressure is definitely hampering the time for photography, but never stopped capturing. Still

review the clicked pictures with the seniors and PTC members. This is what PTC meant for me , a family. For betterment of the club will always suggest weekly /monthly seminars with experts, seniors or PTC alumnus. Also frequent contests, online/offline exhibitions will be always beneficial for PTC/non PTC members.

Alumni Voice

Hi! I am **Subhojyoti Majumder**, I believe a photograph is the only way to showcase your view towards the subject. And, depends on that I become interested. Besides, my study I used to click images in my free time. Currently, I am in TCS, and as a TCSEER we also have Photography Club here so I am continuing my journey. And as a member, we all have to gain our interest to make our club the best.

Alumni Voice

Hello Guys I'm **Nipesh Mondal**. Photography is the best thing that I accomplish in my college days. I completed my engineering and at the same time did practices of photography. In the day we have 24 hour we can do lots of other things, so I managed my time after studying so that photography. This is not just prosperity it also gives me find the cognitive peace and focus on studies and happiness. I recommend this for every learner for finding out there inside thought.

Alumni Voice

Hi guys I'm **Tamojit Bardhan**. My interest in photography came from my love for gadgets. We got our first camera-phone at home when I was eleven. I started taking photographs of clouds with it and I found it really fascinating. At the same time I unknowingly started using Photoshop. Later I got my hands on better cameras, photography books, magazines, etc. and my interest kept growing. When I became a member of the Photography and Trekking Club of JISCE and found like-minded people around me, I was quite sure that it was going to be a part of my career.

Balancing between education and passion never became a challenge for me, because I never gave too much importance to my engineering studies.

I studied only as much as was needed to pass the exams. I never sat for any engineering job interview; I was quite privileged to have supportive parents. After college I did wedding photography for a few months, started a YouTube channel about photography tips and tricks, stopped the YouTube channel and went to the National Institute of Design to study photography. I currently live in Ahmedabad. I am working as a Creative Head at Shibusa Clothing Co., a clothing brand. My job majorly involves photography, so I am still in the field. From my experience in PTC, and then in the world of photography beyond PTC, I can say that while it is a good place to nurture hidden talents into great professionals, everybody does not have to be a professional. The conventional professional photography is just a bucket of water in the ocean of what the photographic medium is.

Basanta Utsav 2022

A day of pomp and show it was, when the B.C Roy Auditorium of JIS College of Engineering was all set to celebrate Basanta Utsav in its full glory and pride. It was held on 15th of March, 2022. Students of various Streams and year of study gathered to celebrate this occasion and ultimately made it a grand success. Out of these people, seven students were from The Photography and Short Film Club including its mentor. They actively took part in the programme by capturing the beautiful moments of exuberance and joy in their cameras. They have helped us to preserve the precious and prestigious moments of our college for years to come.

Kolkata Book Fair 2022

The Photography and Short Film Club, JIS College of Engineering, has actively participated to capture various moments at Kolkata International Book Fair, 2022. Beautiful photographs of daily life have come up. Not only that but also they captured all the performances at the book fair by JISCE. Mentee photographers performed well under the guidance of mentors. They learned from their mistakes. All the photographs have been portrayed on the Facebook wall of Photography and Short Film Club.

International
Women's Day

Women's Day 2022

A grand celebration was organised to mark the International Women's Day on 8th of March in the B C Roy Auditorium at JIS College of Engineering. Students of various Streams and years of study gathered to celebrate this occasion and ultimately made it a grand success. Out of all four students from Photography and Short film club. They captured beautiful moments of the day. They have helped us to preserve the precious and prestigious moments of our college for years to come.

Taking an image, freezing a
moment, reveals how rich
reality truly is...

Thank you

Behind this journey...

Mental contribution: All members of the club

Advising strength: Rupak Bhattacharjee & Jit Chakraborty

Hands on: Antara Kundu (EE,2nd year)

Ritoja Banerjee (CSE,2nd year)

Shruti Sarkar (CSE,1st year)

Shayan Mistri (CSE,1st year)
